SUMMARY

Full-stack software engineer with 4+ years of production experience designing and shipping cloud-native web and mobile systems across FinTech, enterprise SaaS, and health-tech. Proven track record building scalable REST/GraphQL APIs, microservices on AWS, and end-to-end CI/CD pipelines with measurable improvements in latency, reliability, and deployment efficiency. Independently architected and launched a cross-platform mobile app live on the App Store and Google Play. M.S. Computer Science, CSUDH 2024 — STEM OPT authorized through February 2028; eligible for H-1B sponsorship.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, Java
Frontend	React.js, React Native, Next.js, Redux, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, GraphQL, FastAPI, WebSockets, Microservices
Databases	PostgreSQL, MongoDB, MySQL, Redis, Firebase Firestore
Cloud & DevOps	AWS (EC2, S3, Lambda, EKS, CloudWatch), Docker, Kubernetes, Terraform, GitHub Actions, CI/CD
AI / ML	OpenAI API (GPT-4), LangChain, RAG Pipelines, Pinecone, Hugging Face
Security	JWT, OAuth2, RBAC, API Rate Limiting, HTTPS/TLS
Practices	System Design, Distributed Systems, Scalability, TDD, Agile/Scrum, Code Review

PROFESSIONAL EXPERIENCE

Software Engineer · **Snowflake** *Jan 2025 – Present · Santa Ana, CA*

- Delivered full-stack features for Snowflake's enterprise data platform using React.js, TypeScript, Node.js, and Express.js — owning design, implementation, testing, and production deployment on AWS for each release cycle.
- Built a semantic search and document processing engine using **OpenAI GPT-4 and LangChain**, cutting manual data processing time by **30%** in production.
- Containerized microservices with **Docker** and orchestrated on **Kubernetes (AWS EKS)**; built GitHub Actions CI/CD pipelines with blue-green deployments, reducing release cycle time by **40%** and infrastructure overhead by 35%.
- Designed RESTful and GraphQL APIs with JWT/OAuth2, rate limiting, and schema validation — sustaining **sub-200ms P99 latency** under high-concurrency production traffic.
- Instrumented distributed services with AWS CloudWatch, structured logging, and distributed tracing — improving mean time to detection (MTTD) and enabling proactive alerting on throughput and error-rate anomalies.
- Increased automated test coverage by **40%** with Jest and Mocha across React.js and Node.js codebases, reducing production defect escape rate across bi-weekly Agile sprints.

Software Engineer · **Charles Schwab** *Apr 2023 – Dec 2024 · Carson, CA · Part-time*

- Built and maintained production web applications in React.js, Node.js, and Express.js supporting high-availability brokerage account management, trade reporting, and internal analyst tooling.
- Reduced client-server round-trip latency by **20%** by designing RESTful API integrations with HTTP caching, payload compression, and connection pooling between trading front-ends and backend financial data services.
- Automated IT provisioning workflows in Python integrated with ServiceNow and Active Directory, eliminating **40% of manual overhead** across 100+ managed assets and reducing mean ticket resolution time.
- Administered Azure AD, RBAC policies, and security group permissions for 500+ accounts, enforcing least-privilege access controls and standardizing provisioning to reduce misconfiguration incidents.
- Maintained regression test coverage with Jest across financial-critical services to meet compliance-aligned quality standards for regulated financial systems.

Associate Software Engineer · **Capital One** *Dec 2020 – Jul 2022 · Chennai, India*

- Engineered full-stack banking applications in React.js, TypeScript, Node.js, and Express.js serving **10,000+ daily active users** across customer support and operations workflows.
- Reduced P95 API response time by **30%** by implementing a Redis caching layer and optimizing query execution plans and indexes on high-frequency REST endpoints — directly improving SLA compliance.
- Integrated third-party REST APIs and enterprise CRM services into the customer support platform for a 500+ agent team, using backward-compatible API versioning for zero-downtime deployments.
- Optimized MySQL and PostgreSQL schemas with composite indexing, execution plan tuning, and connection pool configuration to sustain high-volume transactional workloads at scale.
- Reduced regression rate by **25%** by authoring Jest unit, integration, and contract test suites, enabling a reliable fortnightly release cadence across mission-critical banking services.

FEATURED PROJECT

HealthW AI — Production Cross-Platform Mobile Application · Sole Architect & DeveloperLive on App Store & Google Play ▶

React Native · Node.js/Express.js · MongoDB · Firebase · AWS (EC2, S3, Lambda) · OpenAI GPT-4 · Redux · JWT/OAuth2 · APNs/FCM

- Independently designed and launched a production-grade cross-platform mobile app for real users on iOS and Android, managing the full system lifecycle from architecture and development through App Store and Google Play release.
- Architected a stateless Node.js/Express.js backend with RESTful API design, JWT OAuth2 authentication with refresh token rotation, and a MongoDB schema with compound indexes and aggregation pipelines for **multi-tenant, high-read throughput** workloads.
- Built real-time data synchronization using Firebase Firestore with optimistic UI updates and cross-platform push notifications (APNs/FCM), maintaining **sub-second sync latency** across concurrent active sessions.
- Integrated OpenAI GPT-4 with a custom prompt orchestration layer to deliver personalized health coaching, BMI-driven meal plans, and weather-triggered wellness recommendations with low-latency streaming API responses.
- Provisioned and managed cloud infrastructure on AWS (EC2, S3, Lambda) with Cloudinary CDN for automated media delivery; executed full App Store and Google Play review, approval, and release pipelines independently.

EDUCATION

Master of Science — Computer Science *Aug 2022 – Dec 2024*

California State University, Dominguez Hills (CSUDH) · Carson, CA

STEM OPT authorized through February 2028 · Eligible for H-1B sponsorship · Open to relocation
